QUARTERLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

I.F.A.S. - Univ. of Florida

Washington, D. C. 20250

Volume 7 No. 1

January 27, 1964

Grain prices generally averaged above a year ago during the last quarter of 1963 reflecting mainly the good export demand. Feed grain stocks on January 1, 1964, were 2 percent above a year earlier, soybean stocks set a record high, but wheat holdings were 11 percent below a year ago. Despite record supplies, soybean prices in January were sharply above last year while most other grain prices were only slightly different from a year ago.

WHEAT ... prices at the farm averaged 5¢ per bushel below the previous year during the last quarter of 1963. The farm price does not reflect the payment of 18¢ per bushel to farmers complying with acreage cutbacks. Ordinary protein hard spring and winter wheats averaged at about last year's level. However, due in part to larger supplies, high protein wheats in January were 14-18¢ per bushel below a year earlier. Reflecting the high export demand red winter and white wheats were well above last year. Record supplies of durum resulted in a drop of 25¢ in prices from a year ago. Stocks of wheat in all positions on January 1 totaled 1.6 billion bushels, the smallest January 1 holdings since 1958. Of the total stocks, Commodity Credit Corporation owned 950 million -- 8 million less than a year ago. Farmers had only 110 million bushels of 1963-crop wheat under price support at the end of December -- 100 million less than a year earlier. Exports of wheat and flour, July through December, totaled a record of nearly 390 million -- 110 million above the year before. Milling of wheat for flour at 310 million was the largest since 1947. Wheat supplies in Canada for 1963-64 are a record high of 1,212 million bushels. Canadian exports of wheat and flour totaled 255 million August through December this year as against 144 million the same months of 1962.

RYE ... prices averaged sharply above last season due to the smaller supplies and the second largest exports in five years. Prices at Minneapolis in January averaged 9¢ per bushel above a year earlier. Rye stocks of 14.8 million were the smallest since 1953 and 37 percent below last year. Exports of 5.8 million, while only half those of a year earlier, were well above average. Other disappearance was near average. Less than a million bushels of 1963-crop rye were under price support at the end of December as against nearly 5 million a year earlier.

CORN ... prices at the farm averaged 9¢ per bushel above a year earlier the first quarter of the season reflecting mainly the record exports. Market prices in January were at about last year's level due in part to a slackening in export demand and relatively unfavorable feeding ratios. Stocks of corn in all positions on January 1 totaled 4,353 million bushels -- 3 percent more than a year earlier. The larger stocks reflect the record crop since the carryover at the beginning of the season was 324 million below a year ago. Of the total January 1 stocks, CCC owned 794 million bushels -- 164 million less than the year before. CCC sales of corn totaled 88 million October through December this season as against 176 million last season. Record exports of 142 million the first quarter were 40 million

above the previous record a year earlier. Around 850 million bushels of corn were fed the first quarter -- well below the year before and the 5-year average. The number of grain consuming animal units fed in 1963-64 is currently estimated at 171.9 million compared with 173.2 million in 1962-63 and 166.0 million the 5-year average. On this basis 4.9 bushels were fed the first quarter this year as against 5.2 last year and 5.3 bushels the average.

CATS ... prices averaged slightly below last season due mainly to the smaller demand. Market prices in January at Minneapolis and Chicago were below last year but at Portland were higher. Stocks of 773 million on January 1 were 2 million more than a year earlier but 11 percent below average. Disappearance mainly for feed, July through December, totaled 484 million -- the smallest in over 20 years. Exports of less than 4 million bushels were the smallest since 1954. Supplies of oats in Canada for 1963-64 at over 603 million bushels were slightly above last year's near-record supply.

BARLEY ... prices at the farm, October-December, averaged 3¢ per bushel above the same months a year earlier. Market prices in January for malting barley were at about last year's level in Minneapolis. However, feed prices at this market were 4¢ lower but on the West Coast ranged 2-4¢ higher than a year ago. Stocks in all positions on January 1 at 329 million were the smallest since 1956. Disappearance of 223 million the first half of the season was 8 million above the previous season. Exports of 28 million were down by 10 million. Imports of nearly 6 million were up sharply from last season but with that exception, the smallest in more than ten years. Supplies of barley in Canada for 1963-64 at 310 million are 86 million above 1962-63.

GRAIN SORGHUM ... prices at the farm averaged 12¢ per cwt. above a year ago the first quarter of the season. Market prices in January were 3¢ lower at Kansas City but 20¢ per cwt. higher at Ft. Worth and 14¢ higher at Los Angeles. Stocks of 572 million cwt. were only slightly less than last year but 105 million cwt. above the 5-year average. Of the total stocks, CCC owned 321 million with an additional 68 million under loan or resale. Exports of nearly 18 million cwt. the first quarter were 1.2 million above a year earlier. The quantity remaining for feed at 102 million cwt. was the largest of record.

SOYBEAN ... prices at Illinois points the first quarter averaged 29¢ per bushel above the same months last year due mainly to heavy domestic and export demand. Prices in January were 19¢ above a year ago. Stocks of 559 million bushels on January 1 were the largest of record and nearly 30 million above the previous high. Crushings of 119 million the first quarter were 6 million below last year's record. Exports of 63 million were also 5.5 million below the 1962 record for the first quarter. Through December 31, farmers put 50 million bushels of 1963-crop soybeans under price support, slightly more than the year before. Soybean oil prices at the beginning of the season were above last year but in December and January averaged below. With meal prices only moderately above last year the processor's margin has averaged smaller than last year.

NOTE: The quarterly supply and distribution table for soybeans was omitted from this report. It is planned to omit it in future reports.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Includes cleaning loss, waste, and statistical errors in estimates.

4/ Less than 1,000 bushels.

FLAXSEED ... averaged \$3.11 per bushel at Minneapolis the first part of January compared with \$3.08 a year earlier. Flaxseed stocks of 29.5 million were 5 million above a year ago and nearly 9 million more than average. Of the total stocks on January 1, CCC owned 1.6 million while over 10 million were outstanding under price support. Exports of flaxseed, July through December, of 2.4 million were below the previous year and the average. Crushings of about 9 million were also below last year and the average. Flaxseed supplies in Canada for 1963-64 total 25 million as against 21 million for 1962-63.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports and quantity of wheat, rye, soybeans, and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. October-December 1963 data partly estimated.

Grains: Quantity outstanding under support and owned by CCC compared with total stocks, January 1, 1964 and 1963
(Data in 1,000 bushels except grain sorghum in 1,000 cwt.)
